APTIVORA GLOBAL SOLUTIONS PVT. LTD. PRESENTS

MEDICAL RECORDS DIGITISATION

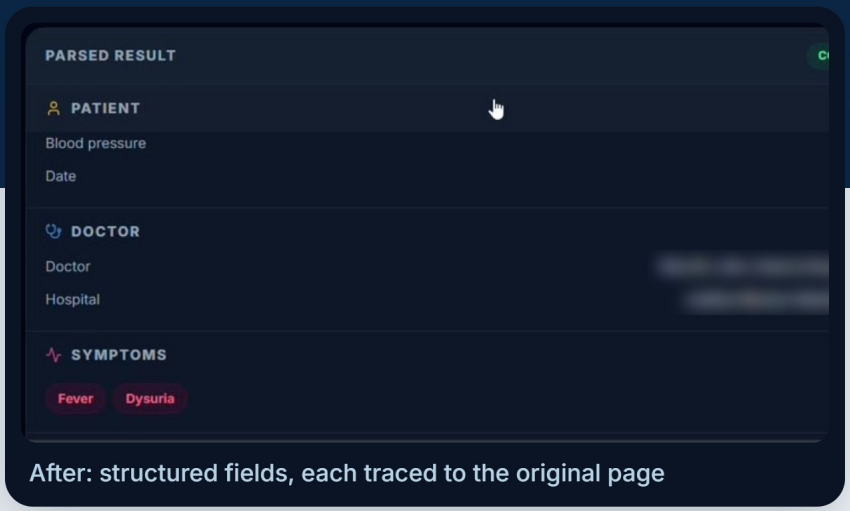

RxCodex

Turn years of paper patient files into searchable digital records.

Scan any handwritten or printed record. AI reads it, checks it, and links every value back to the original page.

Before: old handwritten record, as scanned

After: structured fields, each traced to the original page

Paper in. Searchable records out.

01
Scan or snap
Batch scanner or phone photo, linked to the patient

02
AI reads
OCR + AI agents extract every clinical field

03
Verify
Staff check highlighted fields and confirm

04
Search & use
Full history at the doctor's fingertips

Digitises handwritten records
Reads doctors' handwriting and printed text from prescriptions, case sheets and reports.

Automated drug-interaction checks
Flags interactions, treatment gaps and medicines unrelated to the symptoms.

Bounding-box traceability
Every extracted value is highlighted on the original page for quick checking.

Multi-stage AI agent pipeline
Cleans the image, runs OCR, extracts fields and generates insights automatically.

Smart medicine correction
Fixes misread drug names against the hospital formulary, with reasons shown.

Instant search
Find any patient's past records in seconds instead of searching the record room.

FOR HOSPITAL MANAGEMENT

- Frees record-room space
- Files retrieved in seconds
- Data stays in India, encrypted
- Staff verify every record
